Summary

Frontend developer with a long experience in system administration and IT analytics. Worked in both large companies and small businesses (including freelancing and volunteering).
Ready to relocate to Poland (also considering proposals for a remote job).

Experience

Frontend Developer
Self-employed

Dec 2018 - Present (1 year 9 months +)
Frontend developer. Creation and make changes to web applications on request. Use the following knowledge and tools:
- JavaScript ES5 / ES6+ (asynchronous requests, modular structure),
- Version control system: Git (cli default command),
- Understanding the work of the TCP/IP (OSI) protocol stacks,
- Module bundler: Webpack (with JS compiler: Babel),
- Basic knowledge of library React.js ,
- HTML5 / CSS3 (Flexbox and Grid layout, Bootstrap4, Boilerplate, AnimateCSS, etc.),
- Job experience with web servers: Node.JS, XAMPP (lamp), IIS, NGINX,
- Code editors: VSCode, Sublime Text, Atom,
- Operating systems: Windows / Windows Server (system and network administrator), Linux Mint / Parrot Security / Ubuntu (user),
- Understanding the structure of information security of web applications (within the frames of "OWASP top 10").

As a basic knowledge of the network structure, I draw on the long experience of a systems administrator and IT analyst (also including the management of the IT security infrastructure).

System Administrator / Information Security Specialist
"Houston" system administration team
